Profile

I am a proactive and driven engineer with extensive hands-on development experience, specializing in C#.Net, Java, PHP and ReactJS. Over the years, I have successfully developed software solutions for various business use cases, from conceptualization to deployment, including POS applications, banking technology solutions, eCommerce platforms, car rental apps, APIs, ERP systems, and inventory management programs. With a strong background in finance and expertise in .Net development, I am capable of delivering significant value to my employer. I thrive in collaborative team environments and am always open to new learning opportunities to enhance my skills.

Technologies

- Leadership
- Adaptability
- Communication
- Problem-Solving
- Time Management
- Team Collaboration
- ReactJS
- MERN
- API Development
- Testing (XUnit & NUnit)
- Database Management
- Cloud Technologies (AWS & Azure)

Work Experience

SENIOR .NET DEVELOPER | 06/2024 - till Date

Manifold Computers | Nevada Digitals

- Collaborated within a development team to design, structure, and implement RESTful APIs, ensuring efficient integration and data exchange.
- Contributed to the end-to-end development of a mobile and web banking application for a major commercial bank, optimizing user experience and functionality.
- Partnered with cross-functional teams, including designers and developers, to deliver seamless and scalable banking solutions.
- Utilized Agile methodologies to drive iterative development, ensuring on-time delivery of project milestones and features.

- Enhanced application performance and security by applying best practices in code quality, testing, and deployment pipelines.

SOFTWARE ENGINEER | 08/2022 - 04/2024

POSSHOP Ltd/Yanot Consultants Ltd

- Contributed as a key member of the development team, structuring and developing robust APIs to streamline application performance and integration.
- Developed and deployed ASP.NET Core & MVC projects, utilizing MS SQL, JQuery, HTML, and CSS to enhance user interfaces, resulting in a 40% increase in conversion rates and generating an additional N20M in annual revenue.
- Created and managed database connections using ADO.NET to ensure seamless data interactions and optimized performance.
- Led the maintenance and continuous improvement of an existing Point-of-Sale software solution, ensuring reliability and enhancing system features to meet business requirements.
- Managed database structures, queries, and optimizations using SQL to support application stability, performance, and scalability..

SOFTWARE ENGINEER | 08/2019 - 08/2022

Decagon - Lagos

- Collaborated as a key member of a team to develop and implement back-end API solutions, ensuring seamless integration with front-end applications.
- Built robust, scalable projects using C#.NET, MVC, and JavaScript, driving efficient back-end development and enhancing application functionality.
- Managed and optimized database systems, including MSSQL, PostgreSQL, and NoSQL databases, ensuring data integrity and performance.
- Wrote and maintained comprehensive unit and integration tests to ensure code quality, stability, and functionality across the development lifecycle.
- Contributed to continuous improvement efforts by debugging, troubleshooting, and enhancing existing systems to meet business requirements and user needs.

FREELANCE DEVELOPER, PROJECT MANAGER AND DESIGNER | 08/2015 - 01/2019

InfiniteMinds International

- Led and managed multiple end-to-end development projects, coordinating with clients and teams to ensure timely delivery, within budget, and aligned with business goals.
- Designed and developed custom websites and applications using a variety of technologies, including HTML, CSS, JavaScript, and PHP, enhancing user experience and client satisfaction.
- Managed client relationships by understanding requirements, providing regular updates, and ensuring successful project delivery through effective communication and problem-solving.
- Oversaw project planning, timeline management, and resource allocation to ensure smooth execution of projects and meet all milestones and deadlines.
- Delivered high-quality design prototypes and wireframes using tools like Figma and Adobe XD, ensuring designs met client expectations while maintaining a strong focus on user-centric development.

Freelance Developer, Project and Service Manager | 08/2010 - 08/2015

Keystone Bank Limited

- Branch Administration, Management and Control.

Responsible for overseeing the smooth and efficient running of the operational activities of the branch.

- Organizing in-house training sessions for team members and keeping staff informed of pertinent changes in operational policy and procedures
- Ensuring adherence to service level agreements and ensuring minimal transaction processing error rates in the branch
- Ensuring proper documentation of all transactions and authorizing transactions within approval limits

Education

University of Ilorin - B.Sc Microbiology

- Second Class Upper - Bachelor of Science degree Microbiology
- GPA: 4.18/5.0

Projects

CAR RENTAL SERVICE APP, A web application that offers its users the ability to book, and register for a car. It also allows car owners to be able to put up cars for rentals. The receipt is generated by using QR Library which can be scanned to get the user payment status. The admin part is to check the status of the cars by the owners. The application allows owners to keep track of the location of the car at every given time., .NET Core, Entity Framework Core, Microsoft Identity, XUnit, Jira, Heroku, SQL Server, Docker, QR Library, MVC, <https://github.com/Philipeldavids/CarRentalAPI.git> Contact Book (API), This project is a contact app, it stores a person's contact details., .Net WebApi, Swagger, Heroku, <http://contactbookappapi.herokuapp.com/swagger> IFITNESS ERP FIXED ASSET INTEGRATION, A C# WINFORM application uploading excel format bulk data into company existing ERP., C#, Winform, GitHub, SQL Server, Private custom DECAGON BANK APPLICATION, A C# console application for performing bank services, withdrawal, deposit, transfer etc., C#, winform, GitHub, SQL Server, <https://github.com/Philipeldavids/DecagonBank> Enterprise Resource Application Chicken Republic Food Concept, MVC, C#, Javascript, JQUERY, GitHub, Asp.net Core, SQL Server, Private custom DECAGON SCORE CARD APPLICATION, ASP WEB API, OCELOT, C#, Javascript, JQUERY, GitHub, PostgresSql, ReactJs, <https://github.com/Philipeldavids/scorecard-user-management> Ecommerce Website using ADO.NET and EntityFramework to SQL database, A C# MVC application used to render cshtml pages of an ecommerce application from an SQL database using ADO.NET framework., C#, MVC, SQL, ADO.NET, Javascript, SQL Server, <https://github.com/Philipeldavids/Ecommerce-dynamicADO.NET>
